PROFESSIONAL SUMMARY

Full-stack and backend engineer with hands-on experience delivering production systems at Nokia and building an integrated suite of SK products. Strong in Django, Node.js, TypeScript, React, REST APIs, MongoDB, Redis, realtime communication, AI workflows, media processing, analytics, authentication, and cloud delivery. Focused on secure architecture, maintainable code, measurable product outcomes, and reliable user experiences.

CORE COMPETENCIES

Backend Engineering	Python, Django, Django REST Framework, Node.js, Express, REST APIs
Frontend Engineering	React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive UI
Data and Realtime	MongoDB, PostgreSQL, SQLite, Redis, Socket.IO, SSE, BullMQ
AI and Media	LangChain, LangGraph, LLM workflows, Whisper, OpenCV, FFmpeg, analytics
Cloud and Security	AWS S3, CloudFront, Vercel, Render, SSO, RBAC, encryption, audit workflows

PROFESSIONAL EXPERIENCE

Nokia - Student Intern

Aug 2025 - Jun 2026

Production engineering for internal network, support, media, and issue-management systems

- Built and enhanced three Django-based internal platforms supporting real operational, knowledge, governance, analytics, and reporting workflows.
- Designed backend modules, REST APIs, role and approval flows, search, notifications, audit histories, exports, dashboards, schedulers, and administrative controls.
- Integrated data, media, automation, and infrastructure tooling including Pandas, OpenPyXL, Plotly, Paramiko/AsyncSSH, Celery, APScheduler, OpenCV, Whisper, FFmpeg, and cloud storage.
- Applied production practices including modular design, validation, access controls, deployment configuration, observability-oriented workflows, and maintainable documentation.

NIVR	Nov 2025 - Mar 2026	Video repository with search, uploads, playlists, moderation, engagement analytics, transcription, and media processing.
STSI	Apr 2026 - May 2026	Technical support portal for health checks, RCA, alarms, reports, schedulers, knowledge resources, and secure operations automation.
TSHID	Jun 2026	Critical-issues dashboard with registration, comments, severity, approvals, RBAC, notifications, exports, APIs, and analytics.

SELECTED PRODUCT ENGINEERING

SK Central | Identity and platform

Shared SSO, application catalog, analytics, notifications, administration, and secure cross-application handoff for the SK ecosystem.

Stack: React, TypeScript, Express, MongoDB, SSO

SK Connect | Realtime communication

Code-based connections, messaging, communities, stories, attachments, notifications, and realtime voice/video calling with production security controls.

Stack: React, Express, MongoDB, Socket.IO, WebRTC, Cloudflare TURN

SK MediaFlow | Cloud media platform

Secure uploads, streaming, organizations, creator analytics, AI metadata, media processing, and cloud delivery pipelines.

Stack: React, Prisma, MongoDB, AWS S3, CloudFront, FFmpeg

SK MailPilot | AI productivity

Intelligent Gmail workspace with inbox triage, AI-assisted replies, approvals, scheduling, background automation, and auditable workflows.

Stack: Node.js, MongoDB, Redis, LangGraph, Gmail API, BullMQ

SK Quiz Coach | Adaptive learning

Targeted quizzes, personalized review loops, progress intelligence, analytics, and SK Central identity integration.

Stack: React, TypeScript, Node.js, MongoDB

SK CrawlPulse | AI quality engineering

Autonomous web crawling, journey mapping, and structured functional, API, UI, and edge-case test intelligence.

Stack: Playwright, Node.js, MongoDB, SSE, Mermaid

ADDITIONAL ENGINEERING

SK Interview - Career and interview preparation workspace with guided practice, role discovery, AI assistance, and candidate workflows.

SK JobPilot - AI-assisted career copilot for job discovery, saved roles, application tracking, tailored resumes, interviews, and agent activity.

ENGINEERING STRENGTHS

- Designs APIs and backend modules with clear ownership, validation, authorization, and failure handling.
- Builds responsive product interfaces that prioritize usability, accessibility, performance, and consistent visual systems.
- Works across realtime communication, media delivery, background queues, AI services, analytics, and cloud integrations.
- Documents architecture, deployment, environment requirements, and operational tradeoffs for maintainable handoff.
